

Why spf.io for your church?

Create belonging in your church across cultures, languages, abilities and generations.

Help people worship God in their heart languages, together as one body.

Witness God uniting people of every nation, tribe and language through your church.

With our range of tools, your church can:

- ✓ Make worship services multilingual.
- ✓ Greet and welcome immigrants and refugees coming to your church in their own language.
- ✓ Enable people to pray, speak and share in their heart language.
- ✓ Translate articles, sermons, videos, and more—easily download the translated content to share with your congregation and on social media!
- ✓ Host multilingual bible studies, prayer meetings, fellowship and service activities.

About Us

spf.io (pronounced spiffy-oh) is an all-in-one solution for translation and accessibility.

Our mission is to **make every event accessible in any language** and we are especially passionate about helping churches across the globe live into **God's multilingual vision for the Church**.

Connect with people in many languages

Create belonging across languages, abilities, and generations through multilingual worship, fellowship, and hospitality.

Your solution for

- ✓ Captions
- ✓ Translations
- ✓ Conversations

A Glimpse of What We Offer

Live captions and translations

Caption and translate your worship services and sermons in real time with our AI-based tools. Use it for prepared as well as unscripted content.

Audio livestreaming

Stream spoken interpretation or assistive listening directly to people's smartphones, with no need to buy headset equipment or install hearing loops.

Video captions and subtitles

Caption and subtitle your videos in many languages easily, all in one place, with our AI-based tools. Share on your website, in messaging apps and on social media.

Document translator

Translate your documents (including slides) for articles, sermons, handouts, dockets and more with just a few clicks.

Multilingual conversations

NEW!

Converse with people in many languages online and in person through real time captions and translations.

Multilingual polls

NEW!

Automatically translate questions and motions into many languages so everyone's voice is heard and everyone's vote counts. People vote on their devices.

How can it work for your church?

Projector views can show slides or up to four translated languages.

The audience can receive translation on their phones. They can see slides too.

Preach from a manuscript on your iPad or other device. With a remote operator you can also speak freely into a mic.

You can hire a remote operator to release captions and translation, or train your own staff. We provide onboarding and support.

Whether your gatherings are online, hybrid, or in person, spf.io equips you with tools to bridge language barriers.

Other Features:

Add your own terminology to improve automatic captions. Add human reviewed translations to improve automatic translation.

Embed spf.io on your website next to your livestream so online visitors can view live translation.

Spf.io is browser-based and **does not require installing any apps!** You can integrate it with your church app if you have one.
