

# Why spf.io for your church?

**Create belonging** in your church across cultures, languages, abilities and generations.

**Help people worship God** in their heart languages, together as one body.

**Witness God uniting people** of every nation, tribe and language through your church.

## With our suite of tools, your church can:

- ✓ Make worship services multilingual and accessible for the Deaf and blind.
- ✓ Protect volunteers from burnout.
- ✓ Welcome immigrants, refugees and their families to your church in their own language.
- ✓ Enable people to pray, speak and share in their heart language.
- ✓ Translate articles, sermons, videos, songs, and more.
- ✓ Host multilingual bible studies, prayer meetings, fellowship and service activities.

*We love helping churches across the globe live into God's multilingual vision for the Church revealed from Pentecost to Revelation 7.*

Christopher Lim  
spf.io Founder & CEO

Churches and institutions using spf.io for translation & accessibility:

**Include the Deaf, blind, hard of hearing, & people from many languages**

*(cf Isaiah 35:5-6)*

*We believe accessibility and translation go hand-in-hand; that serving people who've been left out helps everyone. ❤️*

# How can it work for your church?

Join via URL or QR code

Listen to AI translation through text-to-speech

Or listen to an interpreter's audio stream

Read live captions/subtitles. Easily share quotes on social media.

Schedule a demo with us at

[www.spf.io/church-demo](http://www.spf.io/church-demo)

Projector views can show up to four translated languages as well as slides or video.

Preach from a manuscript or speak freely into a microphone/audio input connected to spf.io.

The audience receives captions or translation on their phones. They can see slides and read or listen to the translation.

Embed the audience view side-by-side with your live stream or as subtitles beneath your video on your website. Embed in your app.

## Comprehensive Tools for Multilingual Accessibility

Make your events, content, and conversations accessible and multilingual with features like:

### Automatic Captions & Translation

Deliver live AI translation, captions, and audio for your worship services in 100+ languages.

### Audio Live Streaming

Stream spoken interpretation or assistive listening directly to people's smartphones without extra equipment.

### Multilingual Polls

Automatically translate your polls so people can vote in their own language for in-person, virtual or hybrid meetings.

### Multilingual Conversations

Converse with people in many languages online and in-person through real time captions & translations.

### Audio Video Captions & Subtitles

Easily caption and subtitle your videos into many languages, all in one place.

### Document Translation Portal

Automatically translate articles, sermons, handouts, trainings, dockets, etc. Manage your content & translation team in one place.

### Slide Translator

Translate your slides into many languages with just a few clicks. Easily show slides on big screens and people's mobile devices.

### Song Translator Beta

Automatically generate singable translations of worship songs & empower people to sing together in their language.

“Whereas before, maybe we can only have 20 people listening, now, it's **unlimited**. Before we could only have two languages broadcast at a time, [and] now it is **over 60 languages**. Before, you needed a human translator per language group, but now you need **one operator for 60 languages**.”

**Briana Southerland**  
Share Ministries Pastor  
First Alliance Church, Calgary

### Custom AI

We can build AI models that fit your church's needs from **recognizing or replicating a speaker's voice** to **imitating a translator's style**.

### Vocabulary Fine-tuning

Fine-tune spf.io's language AI to your vocabulary to get **safer & more accurate automatic transcriptions**.

### Integrations +
